NICHOLAS JORDAN

Enterprise IT Operations Leader | Service Delivery | Infrastructure | Digital Workplace | Technology Transformation

Atlanta, GA | linkedin.com/in/nicholasjordan-atl | Professional www.nicholasjordan-atl.com

PROFESSIONAL SUMMARY

Technology operations leader with 30 years of progressive IT experience, including nearly 20 years leading teams across retail, distribution, manufacturing, corporate, and construction-services environments. Builds the operating models, service governance, and resilient infrastructure that let organizations grow with confidence, at scales ranging from a single-site contractor to a 276+ location retail enterprise and a 60+ site manufacturing network with 17,000+ users. Recognized for major incident command, ITSM maturity, digital workplace modernization, vendor and financial stewardship, and developing leaders who sustain results.

Career outcomes include CSAT growth from 82% to 98%, SLA attainment from 81% to 98%+, a 27% reduction in MTTR, 40% fewer repeat incidents, first-contact resolution growth from 68% to 84%, asset recovery from under 10% to approximately 97%, and more than $1.1 million in recurring savings.

SELECTED IMPACT

- **Service Delivery Transformation:** Rebuilt enterprise support governance across 276+ stores, five design studios, five distribution centers, and 3,400+ users, lifting CSAT from 82% to 98%, raising SLA attainment from 81% to 98%+, reducing backlog by 40%, and lowering ticket volume by 22%.
- **Major Incident and Problem Management:** Co-led the Enterprise Incident Management Playbook and a formal incident-command model, reducing MTTR by 27% and repeat incidents by 40% through severity standards, bridge roles, executive communications, root-cause analysis, and corrective-action governance.
- **Digital Workplace and AI-Enabled Support:** Led Intune and Windows Autopilot adoption and integrated Moveworks AI with ServiceNow, Microsoft 365, Workday, and Coupa, cutting provisioning time by more than 70%, raising endpoint compliance from 88% to 96%+, and improving first-contact resolution from 68% to 84%.
- **IT Asset Lifecycle Recovery:** Redesigned joiner, mover, and leaver asset governance with timed escalation, returned-asset certification, and financial accountability, raising post-separation asset recovery from under 10% to approximately 97%.
- **Infrastructure Reliability:** Directed national SD-WAN and wireless modernization, monitoring, and governance, reducing network incidents by 47% and sustaining approximately 99.9% availability.
- **Greenfield Logistics Technology Program (Advisory):** At a site operations director's request, authored a technology program for a global third-party logistics provider's 100,000+ square-foot greenfield bonded cargo facility, including a 66-page program architecture, an execution volume, and an integrated schedule, workforce, and cost workbook currently under executive review.
- **Financial and Vendor Governance:** Governed an approximately $4 million annual IT portfolio within 2% of plan and delivered more than $1.1 million in recurring savings through vendor rationalization, licensing consolidation, and contract governance.
- **ERP Consolidation:** Co-led the consolidation of three legacy systems into SAP S/4HANA across 60+ manufacturing and corporate locations and 17,000+ users at Thyssenkrupp North America.
- **Workforce Development and Succession:** Created the Service Champions, Each-Teach, and Leadership Ladder programs for technical upskilling, peer knowledge sharing, recognition, and succession readiness in Corporate IT Operations.

PROFESSIONAL EXPERIENCE

IT'S ELECTRIC, LLC | Atlanta, GA

Vice President and Head of Information Technology (Fractional) **2026 to Present**

Serve as the executive technology leader for an SDVOSB- and MBE-certified electrical contractor, partnering with executive leadership to align technology investment with growth, operational priorities, and risk.

- Own technology strategy across infrastructure, cloud, cybersecurity, business systems, digital workplace, and service delivery.
- Modernize Microsoft 365 and SharePoint into an integrated operating platform supporting HR, administration, field operations, fleet, assets, and training.
- Architected a Microsoft 365 Business Premium digital workplace, including a hub-and-spoke SharePoint Online intranet with 11 associated sites, a Knowledge Center, and a Fleet Operations Management System deployed through PnP PowerShell.
- Replace manual and fragmented processes with automated workflows, governed data, and scalable platforms.
- Establish IT operating models, policies, SOPs, service-management practices, and executive reporting.
- Direct portfolio planning, vendor strategy, licensing, procurement, and investment prioritization.
- Built a training ecosystem of curricula, assessments, and role-based learning paths, including a five-week IT internship program.

FLOOR & DECOR | Atlanta, GA

Senior Manager, Corporate IT Operations **2022 to 2026**

Led Corporate IT Operations for a high-growth specialty retailer as it scaled from ~168 locations and 2,700 employees to 276+ locations in 39 states and ~3,400 employees, supporting the corporate headquarters, five design studios, and five distribution centers. Scope expanded through an enterprise restructuring, and after receiving "Far Exceeds Expectations" ratings in every annual review, from a Tier 2 senior technical team to a 28-person organization that included managers, leads, Tier 2 administrators, and Tier 3 engineers.

- Served as primary P1/P2 escalation authority and co-led the Enterprise Incident Management Playbook, cutting MTTR 27% and repeat incidents 40%.
- Owned ITSM governance across incident, problem, change, request, knowledge, and CMDB, raising CSAT from 82% to 98%, SLA attainment from 81% to 98%+, and first-contact resolution from 68% to 84%.
- Partnered with IT and HR leadership to redesign the organization around service functions, decision rights, and succession coverage.
- Led Intune, Autopilot, Entra ID, and Conditional Access adoption, raising endpoint compliance from 88% to 96%+.
- Automated joiner, mover, and leaver workflows across HRIS, ServiceNow, Microsoft 365, and Moveworks AI, reducing provisioning time 70%+.
- Rebuilt IT asset lifecycle governance, raising post-separation recovery from under 10% to ~97%.
- Managed a ~$4M IT portfolio within 2% of plan and directed strategic sourcing that delivered $1.1M+ in recurring savings.
- Collaborated with executives and business unit leaders on operational readiness and to align requirements and ownership for Oracle Cloud ERP, Salesforce CRM, Manhattan Active WMS, MobileIQ, StorageBuy, and POS platforms.
- Created the Each-Teach, Service Champions, and Leadership Ladder programs and the John Henry Award for Service Excellence

THYSSENKRUPP NORTH AMERICA | Alpharetta, GA

Manager II, IT Operations, Infrastructure, and End-User Services **2012 to 2022**

Led IT operations, infrastructure services, and end-user technology across 60+ manufacturing and corporate locations and 17,000+ users in a 24x7x365 multinational environment where plant availability and rapid recovery drove production continuity.

- Led 21 senior infrastructure and operations professionals supporting manufacturing, distribution, field, and corporate environments across North America.
- Co-led the consolidation of three legacy systems into SAP S/4HANA, aligning infrastructure readiness, cutover support, and service transition with plant and corporate priorities.
- Directed infrastructure operations, network and workplace support, disaster-recovery readiness, lifecycle planning, and vendor performance across the region.
- Ran production-critical incident response, asset lifecycle, and joiner/mover/leaver operations across plants and corporate sites, building the escalation discipline later formalized into enterprise governance models.
- Partnered with global technology, cybersecurity, application, and manufacturing leaders on transformation roadmaps, enterprise integrations, and cost optimization.

Manager, IT Operations, Infrastructure, and End-User Services **2011 to 2012**

- Managed day-to-day IT operations, infrastructure, and end-user technology services for distributed manufacturing and corporate locations, directing senior technical staff and contractors through workload priorities, escalations, and production-critical incident response.
- Helped establish the customer-service framework, including high-touch support for executive and high-impact user groups.
- Coordinated P1/P2 ITSM escalations .
- Supported audit readiness, SOX compliance, backup, and disaster-recovery readiness

CORE SKILLS

Service and Operational Excellence: ITIL 4, Incident, Major Incident, Problem, Change, Request, and Knowledge Management, SLA, XLA, and KPI governance, CSAT, CMDB, ServiceNow, KCS, and business continuity.

Infrastructure and Digital Workplace: Enterprise infrastructure, network operations, SD-WAN, Microsoft 365, Entra ID, Intune, Windows Autopilot, Conditional Access, endpoint engineering, and asset lifecycle.

Transformation and Architecture: ERP modernization (SAP S/4HANA, Oracle Cloud ERP), cloud transformation, IAM and PAM, AI enablement, RPA, systems integration, and data governance.

Portfolio and Vendor Governance: IT portfolio management, multi-year planning, CAPEX and OPEX, forecasting, business cases, FinOps, strategic sourcing, contract negotiation, licensing, MSP governance, and QBRs.
